SUMMARY

Backend engineer with 6+ years building distributed systems and APIs at scale. Deep experience with Python, PostgreSQL, and cloud infrastructure. Led migration of a monolith to microservices serving 2M+ daily active users. Passionate about developer tooling, observability, and mentoring engineers.

SKILLS

Languages: Python, TypeScript, Go, SQL
Backend: FastAPI, Django, Node.js, gRPC, GraphQL, REST API design
Data: PostgreSQL, Redis, Kafka, pgvector, Elasticsearch
Cloud & DevOps: AWS (ECS, Lambda, RDS), Docker, Kubernetes, Terraform, GitHub Actions
Practices: system design, distributed tracing, CI/CD, TDD, code review culture

EXPERIENCE

Senior Backend Engineer — Northwind Analytics

2022 — Present

- Led migration from a Django monolith to FastAPI microservices, cutting p95 latency by 42%.
- Designed an event-driven pipeline on Kafka processing 50M+ events/day for real-time analytics.
- Mentored 4 junior engineers and introduced a formal code review process across the team.

Backend Engineer — Fieldstone Logistics

2019 — 2022

- Built REST and GraphQL APIs powering a logistics platform used by 300+ enterprise clients.
- Introduced pgvector-based semantic search, improving internal document retrieval accuracy by 35%.
- Owned on-call rotation and reduced incident MTTR from 45 minutes to under 12 minutes.

Software Engineer — Brightloop Inc.

2017 — 2019

- Developed internal tooling in Python/Flask for automated QA reporting across 6 product teams.
- Automated CI/CD with GitHub Actions, cutting average deploy time from 30 to 6 minutes.

EDUCATION

B.S. in Computer Science — University of Washington, 2017

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (2023)
